AIMY QA · DASHBOARD · ONLY MY RESULTS

"Your evaluations": six options

Ways to replace the table in the "Your evaluations" section, which an agent sees on the Dashboard when "Only my results" is on. Every option shows the same four sample evaluations against an 85% goal: EV-0541 (71%, needs attention), EV-0538 (88%), EV-0533 (93%, a call) and EV-0529 (84%), all on Upland · KCM. In the browser you can click any evaluation to see what it would open, and switch between the dark and light themes.

4A Grouped by day

The feed splits into days on a single timeline rail, with how long ago each was. Each evaluation is one sentence; the one that needs attention carries its own Ask AiMY action, so the next step sits right where the problem is.

Strong

- Reads like a diary of your week; scales well when one day has several evaluations
- The action appears only where it's needed

Weak

- Day headers add height when every day has one evaluation
- Score is inside the sentence, so comparing takes reading

4B Feed with goal meters

A feed and a goal bar together: each line keeps its sentence, gains a thin meter with your 85% goal tick, and the score moves to the right edge, large. You get the explanation and the at-a-glance comparison together.

Your evaluations

Export CSV

Newest first · tick = your 85% goal

Tue 13 Oct	**EV-0541** · Ticket · Upland · KCM · NEEDS ATTENTION	71% -14 vs goal
Mon 12 Oct	**EV-0538** · Ticket · Upland · KCM	88% +3 vs goal
Sat 10 Oct	**EV-0533** · Call · Upland · KCM	93% +8 vs goal
Fri 9 Oct	**EV-0529** · Ticket · Upland · KCM	84% -1 vs goal

Strong

- Sentence for meaning, meter for comparison, big score for scanning
- Status chip only when it matters, so the list is quieter

Weak

- Three ways of showing the score in one row
- Slightly taller rows than the plain feed

4C Feed with change since last

Each evaluation shows its score as a coloured badge and how it moved from your previous one. The story of the week becomes explicit: up 9 on the call, then down 5, then down 17 on EV-0541.

71% **EV-0541** · ticket evaluation, 14 pts under your goal
Tue 13 Oct · Upland · KCM · needs attention · vs EV-0538 (88%)
Down 17 pts

88% **EV-0538** · ticket evaluation, 3 pts over your goal
Mon 12 Oct · Upland · KCM · vs EV-0533 (93%)
Down 5 pts

93% **EV-0533** · call evaluation, 8 pts over your goal
Sat 10 Oct · Upland · KCM · vs EV-0529 (84%)
Up 9 pts

84% **EV-0529** · ticket evaluation, 1 pt under your goal
Fri 9 Oct · Upland · KCM
First this period

Strong

- Answers 'am I getting better or worse?' row by row
- The drop on EV-0541 stands out without a chart

Weak

- The delta compares different ticket types and products when those vary
- The oldest one has nothing to compare against

4E Score on the rail

The timeline's dots become the scores themselves: a ring on the rail, coloured by where it sits against your goal. The sentence beside it says what happened; the date sits on the other side of the rail.

Your evaluations

Export CSV

Newest first

Tue 13 Oct	71	**EV-0541**, a ticket, 14 pts under your goal. Upland · KCM · 8 days ago · NEEDS ATTENTION
Mon 12 Oct	88	**EV-0538**, a ticket, 3 pts over your goal. Upland · KCM · 9 days ago
Sat 10 Oct	93	**EV-0533**, a call, 8 pts over your goal. Upland · KCM · 11 days ago
Fri 9 Oct	84	**EV-0529**, a ticket, 1 pt under your goal. Upland · KCM · 12 days ago

Strong

- The timeline and the scores read in one vertical pass
- Colour and number together, so status isn't colour-only

Weak

- Big nodes make each row tall
- Rail breaks visually when one day has several evaluations

41 One line each

The feed at its densest: one line per evaluation with a colour edge, date, ID, a short phrase and the score. It keeps the feed's sentences but at table height, for when the list grows.

Your evaluations

Export CSV

Newest first

Tue 13 Oct **EV-0541** 71%

Ticket, 14 pts under goal · needs attention

Mon 12 Oct **EV-0538** 88%

Ticket, 3 pts over goal

Sat 10 Oct **EV-0533** 93%

Call, 8 pts over goal

Fri 9 Oct **EV-0529** 84%

Ticket, 1 pt under goal

Strong

- Fits many evaluations without scrolling
- The colour edge gives status at a glance

Weak

- Sentences shrink to phrases, losing some of the feed's clarity
- Status chip is gone; the edge and score carry it

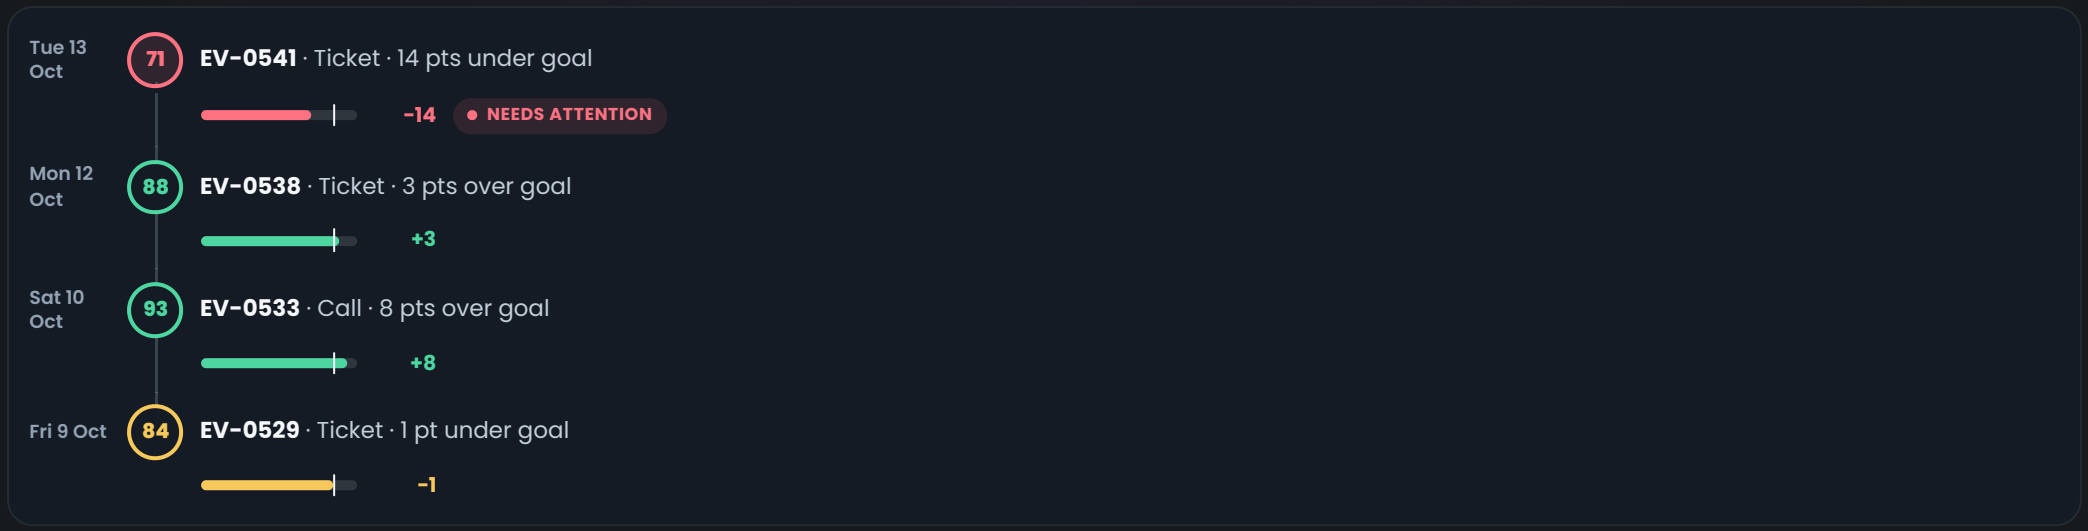

M3 Rail with goal meters

4E's score ring on the rail at 4I's one-line height, plus 4B's goal meter on the right with a tick at 85% and the gap in points. The ring gives the score; the meter shows how close that score was to your goal.

Your evaluations

Export CSV

Newest first

Strong

- 84% vs 85% reads as 'almost there' in the meter
- Right edge lines up into a comparable column

Weak

- Score appears twice (ring and meter)
- Busier than the plain rail
